- Message of Humanity: Donating blood, not only saves multiple lives but also give an opportunity to add value to one's life. It helps in teaching students about humanity and also defines the spirit of our natural co-existence for others.
- Life Saving Measures: Blood cannot be produced artificially. Requirement of blood arises during medical emergencies, accidents and life threatening diseases. Teaching people about the importance of blood donation at an early stage will help in saving human lives and the sense of self gratification.
- Ensuring Supply of Blood: Fresh blood is produced in the body. After donating the blood new blood cells get stimulated and improve the blood circulation of the body. It ensures adequate supply of blood to the blood bank which can be used for the needy patients.

- **Suitable Donors:** The purpose of blood donation camp is to select a suitable donor whose blood is safe for the recipients. With increase in population and development of more advanced medical and surgical procedures, the need for blood is increasing day by day. Voluntary blood donors facilitate in maintaining adequate supply of blood.
- **Removal of myths:** Blood donation is a noble act. Many people have wrong notions about blood donation and hesitate to donate blood. With the help of the Blood Donation Camps the misconceptions can be reduced and significance of donating blood can be inculcated.
