B.E. COMPUTER AND COMMUNICATION ENGINEERING
--

I VISION OF THE DEPARTMENT

To become a preferred destination in global level for solving the real time societal challenges through research and academic excellence by creating highly competent professionals in the broader domain of Computer and Communication Engineering.

II MISSION OF THE DEPARTMENT

- ❖ To provide an ambience with updated technology, teaching learning practices and establishes effective industry-institute interaction in the area of Computer and Communication Engineering.
- ❖ To inculcate professional norms, practices and social responsibility in the younger minds for promoting research and solving ever growing needs of the industry and society.
- ❖ To promote entrepreneurship and leadership among the younger generation for their personality development.

III PROGRAM EDUCATIONAL OBJECTIVES (PEOs)

Graduates can

- ❖ **PEO1:** To provide a platform by applying advanced techniques and tools for building solutions to complex engineering problems.
- ❖ **PEO2:** To Apply design principles and best practices for developing quality products for scientific and business applications.
- ❖ **PEO3:** To enable graduates to pursue research, or have a successful career in academia or industries associated with Computer and Communication Engineering, or as entrepreneurs.
- ❖ **PEO4:** To prepare students to critically analyze existing literature in an area of specialization and ethically develop innovative and research oriented methodologies to solve the problems identified.
- ❖ **PEO5:** Promote collaborative learning and spirit of team work through multidisciplinary projects and diverse professional activities.

IV PROGRAM OUTCOMES (POs)

- 1.Engineering Knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
- 2.Problem Analysis:** Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
- 3.Design/Development of Solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
- 4.Conduct Investigations of Complex Problems:** Use research-based knowledge and research methods, including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
- 5.Modern Tool Usage:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
- 6.The Engineer and Society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
- 7.Environment and Sustainability:** Understand the impact of the professional engineering solutions to societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
- 8.Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
- 9.Individual and Team Work:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
- 10. Communication:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
- 11.Project Management and Finance:** Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
- 12.Lifelong Learning:** Recognize the need for, and have the preparation and ability to engage in independent and lifelong learning in the broadest context of technological change.

V PROGRAM SPECIFIC OUTCOMES (PSOs)

- PSO1:** Globally compete with engineering specialists, to solve engineering problems in the field of Computer and communication based on industrial and social requirements.
- PSO2:** Understand the evolutionary changes in Computer and communication, creating an innovative career path to be an entrepreneur and lifelong learner with moral values and ethics.
- PSO3:** Apply appropriate technology for the implementation of modern Communication systems.
- PSO4:** Develop quality software for scientific and business applications by applying software engineering principles and practices.

Registration of Professional Elective Courses from Verticals:

A student can choose all the Professional Elective Courses either from one of the verticals or a combination of courses from all verticals in a semester. However, students irrespective of enrolling for additional courses for B.E. / B. Tech. (Hons.) are not permitted to choose more than one course from a row. Students are permitted to enroll more than one elective course from the same vertical in a semester. In the subsequent semesters students are permitted to enroll one more course in a row, provided if he/she has cleared the earlier course of the same row.
